

Power handling:	4 ohms, nominal 20 Watts RMS, compatible to amp up to 40 Watts output.
Frequency range (± 3 dB):	110 Hz ~ 20 kHz.
Sensitivity:	84 dB SPL (1 w @ 1 m).
Amplification Compatible:	with amp from 10 Watts to 40 Watts Output/Channel.
Drive units:	One 70 mm mid-range / bass driver and 19 mm High frequency soft dome tweeter.
Dimensions (HxWxD):	184 x 132 x 120 mm / speaker.
Weight:	2.2 Kg / pair (without wire and packaging).

*Final specification is subject to L&I's latest confirmation.

bolero mini

We design Bolero Mini based on the concept as Bobo. Using less and different materials to form a good acoustic and eye-catching speaker that is not only an audio item but part of one's interior. People today prefer space-saving stuff but function and performance must be good enough for their living environment. We keep the same round back cabinet as the resonance chamber, custom-made the 70 mm diameter mid-range / bass driver and a 19 mm soft dome tweeter which can deliver you amazing acoustic ranging from 110 Hz to 20 KHz. High sensitivity from this little speaker is up to 84 dB. Hearing is believing!
