S Bass

Blend 2 Sambas by adding an S Bass, the result is a sound that quite simply leaves most other small sub based systems behind in the dust. The S Bass unit has been designed from the ground up to deliver a thrilling controlled bass sound. The active amplifier perfectly controls the output. The result is a musical combination covering an ultra wide sound spectrum usually the reserve of much larger systems.

Samba (Satellite speakers)

Samba speakers

Samba takes the purity concept to its limits. Like the Bolero, Samba drive units employ the same technology to deliver a wide range of sound while being clothed in a neat clean looking body, making this system suitable for many computer based, mini-desktop and tabletop uses.
